## **Fall 2014 Brush, Limb & Leaf Collection**

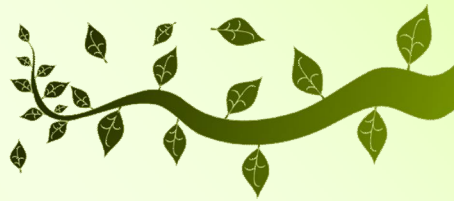

The Town of Zionsville's Street & Stormwater Department will be providing curbside brush & limb collection beginning on Monday, October 6 and running through Friday, October 17. This service provides Zionsville residents in the urban district a means to dispose of certain fall pruning and yard debris. The Town cannot guarantee the collection unless your items are out curbside by 7:30 a.m. on your designated pick-up day. Pick-up days for your area can be found on the Town of Zionsville's website or call the Town at 317-873-4544. Limit on size is 6 inches in diameter. Grass clippings, leaves, decorative grass, vines, stumps, root balls, construction lumber, firewood, and wooden fencing material will NOT be collected. Bundling is not required. Limbs up to 6 inches in diameter may be left intact but should be no larger than can be managed by one person.

The Town of Zionsville's annual curbside collection of leaves will begin on Monday, October 20th for residents in the urban service district. Residents are to deposit their leaf piles as close as possible to the roadways to ensure collection. Leaves should be placed in long, narrow rows with no other items such as sticks, grasses or tree limbs. This service will continue through the first week of December pending an early onset of winter weather. Every attempt will be made to provide this service at least once a week. However, a heavy leaf drop may not allow weekly service at times, and rain will interrupt the schedule as the machinery cannot collect the extra weight of water. The schedule generally begins each week on Monday in the Village area, then crews work clockwise around Zionsville the rest of the week. Specific days of collection cannot be guaranteed due to the fluctuating volumes encountered.

The City of Lebanon's annual leaf collection will be from October 13 until November 26 and will coincide with the homeowner's normal scheduled trash day. The leaf pile is to not contain any limbs as it causes damage to the leaf vacuum.

One additional note, the City of Lebanon and the Town of Thorntown do provide clean-up for storm debris, when necessary. Please contact them directly if this service is needed in your area.

## **Another Successful Fall Collection Event**

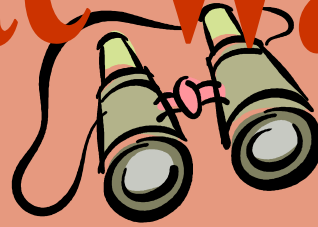

The District welcomed **444** vehicles through the recent Household Hazardous Waste & Electronics collection event on Saturday, August 23! The totals are not in for HHW yet, but over 4.5 tons of electronics were collected! Thanks to all that participated!

Our next collection event will be held in the Spring in the City of Lebanon. If you have HHW to dispose of over the winter, contact the District regarding our voucher program.

## **Where Do I Take ... a Dehumidifier?**

Dehumidifiers remove moisture from the air. They do this by cooling the air that is drawn into the unit, causing condensation. The condensed moisture is stored in a holding tank that you must empty on occasion. To cool the air within the unit, a dehumidifier uses Freon (chlorofluorocarbon gas). Because it contains Freon, you cannot throw out your dehumidifier or other appliances that contain Freon (i.e. refrigerators & air conditioners) with your

regular trash. You must dispose of them at locations that have a certified Freon technician on staff. A local facility is Boone County Resource Recovery at 985 South SR 421 in Zionsville. Please call 317-769-4223 for hours & fees.

## **Upcoming Events**
